Washington, DC 20554

Dear Federal Communications Commission:

As you consider the conditional approval for LightSquared, I write to ask you to preserve the integrity of the nation's GPS system.

Last year, the federal government shut down the Loran navigation system, making recreational mariners solely reliant on GPS for all electronic navigation needs. Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

As a along range off shore angler with two GPS systems on board (for back should one fail) and the VHF radio interconnected the GPS for DSC sending in the event of an emergency and a 406 EPIRD all rely on a accurate signal to operate without interference. Should the Federal Government approve the LightSquared system you now have placed all boater's safety in jeopardy along with the responding emergency organizations providing aid to a boaters emergency.

In the interest of boating safety and the boater's lives at risk please do not approve the LightSquared system.

Sincerely,

Leonard Harris
9416396546

Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

I am a recreational angler and rely heavily on my gps for navigating the waters of the Texas coast. The gps system has help me in numerous ways on getting back to the boat ramp safely especially in low light conditions and bad weather. Please protect the integrity of the GPS signal.

Thank You

Sincerely,

Norbert Ramon

July 19, 2011

Federal Communications Commission
445 12th St., SW
Room TWA325
Washington, DC 20554

Dear Federal Communications Commission:

As you consider the conditional approval for LightSquared, I write to let you know I feel you absolutely must preserve the integrity of the nation's GPS systems.

In the June 30th report, the navigation sub-team concluded "that all phases of the LightSquared deployment plan resulted in widespread harmful interference to GPS signals and service and that mitigation is not possible."

I regularly rely on accurate GPS signal to precisely identify my location both on the saltwater and our freshwater rivers. Most recently, we were able to locate a small freshwater spring by GPS to refill our water supply on a multi-day river outing.

Any interference with GPS accuracy, in my mind, is not even an option. So many aspects of our navigation and identifying location depend on a solid, accurate GPS signal.

The FCC must protect the integrity of the GPS signal. Thank you very much.

Sincerely,

Ed Megill

Washington, DC 20554

Dear Federal Communications Commission:

As you consider the conditional approval for LightSquared, I write to ask you to preserve the integrity of the nation's GPS system.

Last year, the federal government shut down the Loran navigation system, making recreational mariners solely reliant on GPS for all electronic navigation needs. Like so many other GPS users around the country, GPS is now integrated into our daily outings, and we look to the FCC to protect the integrity of the GPS signal.

Sincerely,

GERALD F. ANDERSON
